1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hansen.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hansen.

Claim 8 defines over Hansen only in the recitation of the turret being inclined at the particular angle of 15°. Nonetheless, no patentable distinction is deemed to exist between the angle as claimed and the angle as taught by Hansen. Re claim 11, to employ a plurality of rinsing modules is deemed to be an obvious extension of the teachings of Hansen.

5. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hansen in view of Mondloch.

Claim 9 defines over Hansen only in the recitation of the drying stage. Mondloch discloses the drying stage. It therefore would have been obvious to one having ordinary

skill in the art to modify the device of Hansen to include a drying stage as taught by Mondloch, for the purpose of removing any residual cleaning fluid from the cans.

6. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hansen in view of Beyer et al.

Claim 13 defines over Hansen only in the recitation of the ionized water. Beyer discloses the cleaning of cans with ionized water. It therefore would have been obvious to one having ordinary skill in the art to modify the device of Hansen to employ ionized water as taught by Beyer, for the purpose of precluding mineral deposits.

7. Claims 12 and 14 stand objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Olmsted, Reynolds et al., Dobrink, Taniguchi, Noguchi et al., Schregenberger, Hartnig, Mcbrady, and Kronseder, note the cleaning arrangements.
